PROJECTS

Random quoute generator

URL: https://vaibhannegi.github.io/stonepaper-game/quotegen.html

The role of a random quote generator is to provide users with a randomly selected quote from a collection of quotes. The quotes can be motivational, inspirational, or humorous. The generator can be used for various purposes, such as to provide inspiration, to generate content for social media posts, or to add variety to a website.
There are several ways to create a random quote generator. One way is to use JavaScript to randomly select a quote from an array of quotes and display it on the webpage1. Another way is to use APIs that provide access to collections of quotes. For example, the Forismatic API provides access to a collection of over 1.5 million quotes in different languages

i will be designing a Random Quote Generator from scratch using HTML, CSS, JavaScript, and type.fit API. The webpage displays a random quote from a collection and upon the click of a button, it randomly generates a new quote. We will first generate the basic HTML Template and style it using CSS before diving deeper into the JavaScript Logic.

EDUCATIONS

College/school	Degree/Standard	Passing Date
dev bhoomi uttaarakhand university	b.tech	Present

PERSONAL INFORMATION

Date Of Birth	10-01-2004
Country	Singapore
Father's Name	mr. birendra singh negi
Marital Status	Single
Gender	Male

Languages Known	Hindi, English
Address	madhuban colony, peerumadara , ramnagar,nanital,uttarakhand, ramna, Uttar Pradesh, Singapore

I hereby declare that all above information is in correct with fact or truth up to my knowledge and I bear the responsibilities for the correctness of the above mentioned particulars.
